

How We Recycle At UCI

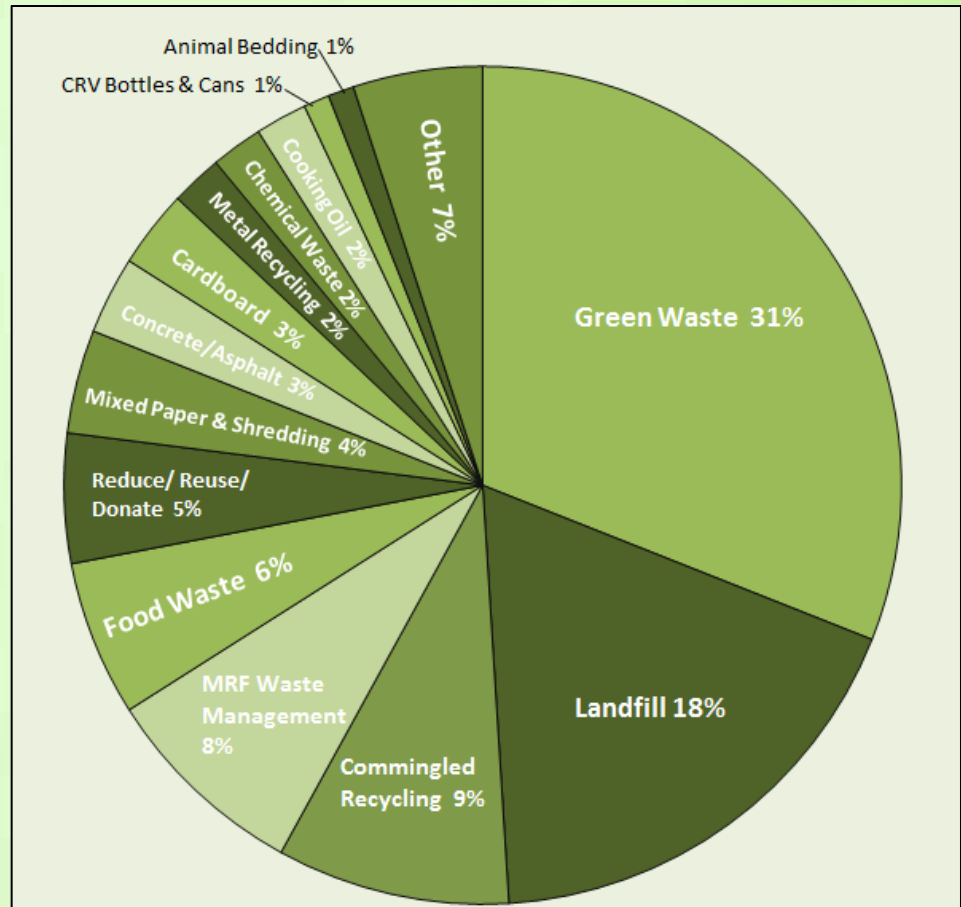

On all pedestrian walkways throughout campus, Commingled Recycling bins are paired with trash cans.

With help from TGIF, both the Bren Events Center and the Baseball Field are now Zero Waste Facilities and use these brand new bins

What We Recycle

With almost 30,000 students and 8,000 faculty and staff on campus, UC Irvine produces about 10,000 tons of solid waste annually—82% of which is diverted away from landfills by recycling and composting, thanks to our Recycling Program.

UCI Student Housing

Coming Soon to Housing in 2015: New signs will adorn all of the student housing bins, making the sorting process easier and increasing our recycling rate!

Mesa and Middle Earth dorms have received all new image style bins signs. This project was completed by student work in Facilities Management as part of a field study internship.

In the fall of 2014, as part of a case study, each student home received bags designed specifically for student recycling. These bags were provided through our partnership with Waste Management. The data from this case study will help determine if using the bag improves the diversion rate in multi-family style housing.

WE RECYCLE!

UCI Bins

UCI has many different kinds of bins that we use to safely contain all types of materials!

Cardboard collection station

UCI students decorated classroom Commingled Recycled bins to help bring awareness about the recycling program to the campus community.

Desk-side bins for Mixed Paper

Green bins are used for Batteries and Printer Cartridges

Peter's Exchange handles any E-Waste we have on campus

These containers are used for Hazardous Waste
