EMERGENCY GENERATOR AND AUTOMATIC TRANSFER SWITCH (ATS) TESTING SCHEDULE

NOTE: The State of California Title 19 requires a monthly test of Emergency Generators
ATS (Automatic Transfer Switch) Switch.

Only the Emergency Electrical Circuits are interrupted during this test.

The testing procedure requires a 10 second outage of the Emergency Circuits as they
switch from the normal electrical power source over to the Emergency Generator.

During these tests the Emergency Circuits are powered by the Generator for
approximately 30 minutes.

At the end of the test a 1 second outage will occur as the system switches from the
Emergency Generator back to the normal utility power source.

(NT): Generators will be tested, ATS switches will not be tested at this time.
(T): ATS to be tested and operated as scheduled.
